

LESSON 4:
INNOVATION
CHALLENGE 10

Invent something that no one has thought of before. You can make up something imaginary, or start with something that already exists and change it into something new. But you have to draw or describe your invention so that the rest of the class can understand what it is.

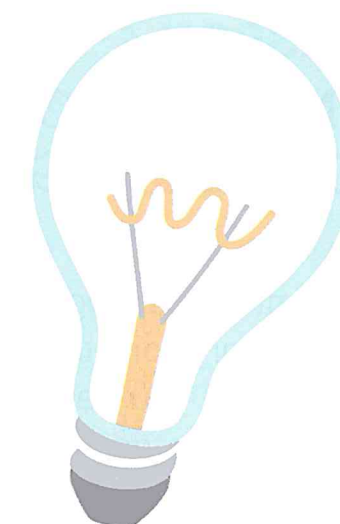

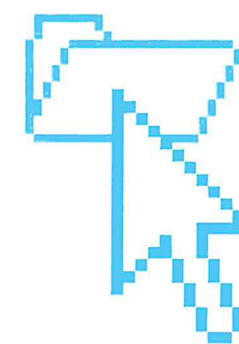

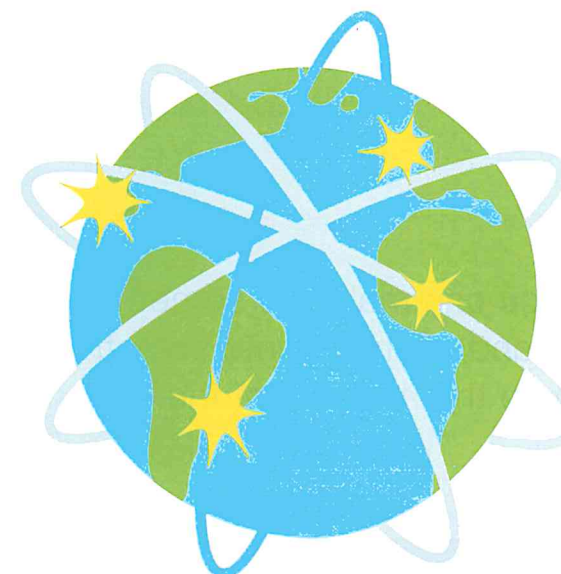

Your challenge is to invent something to meet this need:

Children know they should eat a balanced choice of foods but sometimes they think it is too much trouble to fix a meal that includes all four food groups. Invent a way for them to get balanced meals without having to keep track of everything they eat.

Draw or describe your invention in the space provided
